#### Methodology

How did we conduct the survey?

Survey conducted online by BVA Xsight from March 27th to April 9th, 2024, in the 27 EU countries.

Total sample of 22 726 European people made up of 27 representative samples of each country's population aged 15 and over (16+ for Luxembourg).

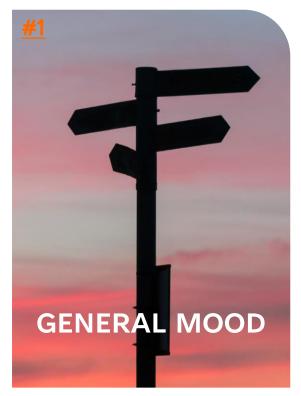

The representativeness of the survey was ensured by the quota method. The samples of each country were built according to national statistics (gender, age, occupation and place of residence). The European average has been weighted according to each country's population weight.

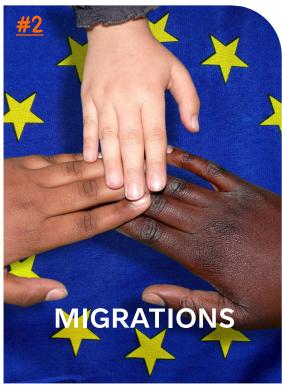

A detailed notice for this survey can be consulted on the French "Survey Commission" website.
